

SECURITY COMMAND CENTER RENOVATION

GRAND VALLEY STATE UNIVERSITY
Pew Campus – Eberhard Center
August 2002
Total Project Cost: \$150,000

Project Overview

Due to the increase in buildings and housing located on GVSU's Pew Campus, the main security command center at the Eberhard required renovations to the existing space to accommodate monitoring for the whole downtown campus. Century A&E and Design Plus collaborated on the design of the space renovations. The renovation included upgrades to the layout of their 24/7 monitoring area, new security equipment room, conference room, and other enclosed office space. The renovation also included new lighting, emergency power upgrades, HVAC, and updated wall and floor finishes. This project required set-up and coordination for relocating the command center until construction was completed.
